

I Didn't See It Coming

Belle and Sebastian

Make me dance, I want to surrender

Your familiar arms, I remember
We've been going transcontinental
Got no car, we just take a rental

But we don't have the money

(Money makes the wheels and the world go round)
Forget about it, honey

Make me dance, I want to surrender
Your familiar arms, I remember

Everybody's talking about you
Every word's a whisper without you

But we don't have the money
(Money makes the wheels and the world go round)

Forget about it, honey
Trouble's never far away when you're around

I didn't see it coming
I'm just not in the running

Take me on a train 'cos I'm not flying
I can see the world from a different side
Read about us in the morning papers

When we make it alive

I didn't see it coming
I'm just not in the running

And we don't need a lifetime
We're following the right line
