

Brace Yourself

Ben E. King

When I saw you standing over there in the corner
I told myself good God, she's nice and I want her
So here I am baby, understand
You don't need to ?, to make me stop

So pay attention to this
You're gonna get kissed
You better brace yourself

Just snap your finger, and I'll start into hopping
You got my mind going wild and there's no stopping
So here I am baby, please don't run
I know that we can have lots of fun

So pay attention to this
You're gonna get kissed

You'd better brace yourself

You make me feel like I've never felt before
I feel like I could lift
A hundred tonnes or more

I'd go to pieces babe, if you should reject me
And I know I'd die if I thought you'd forget me
I don't know what's come over me
I only know that it's heavenly

So pay attention to this
You're gonna get kissed
You'd better brace yourself
Here I come baby
With all that's ?
Here I come baby, with lips that's gonna kiss you
