

Walk Through Fire

Ben Fuller

Walk through fire

Walk through fire

I was worn down
I was snuffed out
Nowhere left to go
Heart heavy
Soul weary
My world a cloud of smoke

Turns out
You were waiting in the ashes
And now
I can say

Every flame
Forged my faith
The inferno might have burned me but it set my hope ablaze
Every coal
Refined my soul
It only made my darkest days a whole lot brighter
Thank God I had to walk through fire

You were faithful
More than able
You never lost control
You were speaking
You were reaching
In the heat of it all

Turns out it was there that I was changed

Every flame
Forged my faith
The inferno might have burned me but it set my hope ablaze
Every coal refined my soul
It only made my darkest days a whole lot brighter
Thank God I had to walk through fire

(Walk through fire)
Thank God I had to walk through fire
(Walk through fire)

Because You said You'd never leave me
And You said You won't forsake me
Whatever comes, I will not be afraid (Be afraid)
You've already gone before me
You've already gone behind
In the end, I know I'll look back and I'll say

Every flame
Forged my faith
The inferno might have burned me but it set my hope ablaze
Every coal
Refined my soul
It only made my darkest days a whole lot brighter

Thank God I had to walk through fire

(Walk through fire)

Thank God I had to walk through fire

(Walk through fire)

Thank God I had to walk through fire
