

## Filler

Ben Gibbard

What happened to you?  
You're not the same  
Something in your head  
Made a violent change

And it's, it's in your head, it's in your head, it's in your head  
ad  
You call it religion, you're full of shit

Was she really worth it?  
She cost you your life  
She'll never leave her side  
She's gonna be your wife

And it's, it's in your head, it's in your head, it's in your head  
ad  
You call it romance, you're full of shit  
It's in your head, it's in your head, it's in your head  
If you call it romance, you're full of shit

Your brain is clay  
What's going on?  
You picked up a Bible  
And now you're gone

And it's, it's in your head, it's in your head, it's in your head  
ad  
You call it religion, you're full of shit  
It's in your head, it's in your head, it's in your head  
You call it religion, you're full of shit

You never have, you never will
