

## Below Sea Level

Ben Harper

I fear that everything is happening in this world  
Some days it brings me to my knees  
You said I dropped in on the wrong planet  
As if it were up to me

When I'm down in  
My heart pounding  
Below sea level  
Below sea level

We belong to us  
Glitter covers the dust  
My best efforts met with disdain  
Surrender by another name

A deep breath  
Is all that's left  
Below sea level  
Below sea level

Read in the papers  
Watch on the news  
Planet's hanging on  
By the string of its shoes

You sing high  
I'll sing low  
Down where daylight dare not go

Below sea level  
Below sea level  
Below sea level  
Below sea level
