

# Where Did We Go Wrong

Ben Harper

Was it the last time  
Or the time before  
Not sure what comes first  
The wager or the war  
To dismantle or detonate the bomb  
Where did we go wrong

Straight talk only  
Accept no substitute  
Must be lonely  
Living in absolute  
It's an emergency  
Try to remain calm  
Where did we go wrong

Lost all perspective  
Nowhere to take aim  
With new marching orders  
To find someone else to blame  
They stormed the castle  
But the king turned out to be a pawn  
Where did we go wrong

So long so wrong  
So long so wrong

Cold sits in my bones  
I forget how to be warm  
So far from home  
I forget what it is to be born  
Was the fruit on the tree too long  
Where did we go wrong
