

Implants

Ben Kenney

I'll pack my things and go
I came here for the free food not the show
The heart it over flows,
With all this bullshit found
Where she's been and who she knows

I found out what I wanted to know
Don't think you can hide it
Your putting pretty where this shit doesn't grow
As if you need to be reminded

Life's precious little gem's
Not quite the size the doctor recommends
I guess it all depends
This could be so real if only I pretend

I found out what I wanted to know
Don't think you can hide it
Your putting pretty where this shit doesn't grow
As if you need to be reminded

I found out what I wanted to know
Don't think you can hide it
Your putting pretty where this shit doesn't grow
As if you need to be re,
As if you need to be re,
As if you need to, you need to be,
you need to be reminded

stretch that skin
and rip that skin
and put this in
and now you're perfect,
now you're perfect

stretch that skin
and rip that skin
and put this in
and now you're perfect,
now you're perfect

Does anybody know how long the plastic takes to decompose?

I found out what I wanted to know,
Don't think you can hide it!
Your putting pretty where this shit doesn't grow!
As if you need to be reminded...
