

# Stop!

Ben Lee

Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
You've got to make a serious decision

It could be me up there in stage lights  
It could be me on the TV in your living room  
It could be me jet setting with my band all across the world  
Appearing live in concert one night only, tickets sold out

Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
You've got to make a serious decision

There I am giving candid disclosure to press in interview  
There I go on my way through the crowd up to the podium  
On behalf of our fans, we'd like to accept this award  
Smile for the camera, boys, gold record in hand

Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
You've got to make a serious decision

All of our lives in waiting  
All of our lives traded for their roses and applause  
All of our lives dedicated to shoving it right back in their fucking face

Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
Stop, take some time to think, figure out what's important to you  
You've got to make a serious decision
