

come back

Ben Platt

There is a place we can go
Not too far away from here
Hold on, I'm gonna show ya
Close your eyes and disappear

There's no shadows, there's no rain
There's no need to be afraid
There's no worry in your mind
To bring you down
There's no hurry up and wait
There's no cover that you pay
If you take my hand, I'll take you there right now

Oh, we, we got so much to see
Put your love on me and we're there
One touch and we're on our way
We could float away through the air
And if we run away to a place like that
We might go and never wanna come back

There is peace for your soul
Not too far away, my darling
Flowers wherever you go
Come and meet me in my garden

We can dance between the rain
Living in the world we made
We can dive into each other, you and I
There's a river we can take
Running off to better days
If you take my hand, I'll take you there tonight

Oh, we, we got so much to see
Put your love on me
And we're there
One touch and we're on our way
We could float away through the air
And if we run away to a place like that
We might go and never wanna come back

We, we got so much to see
Put your love on me and we're there
One touch and we're on our way
We could float away through the air
And if we run away to a place like that
We might go and never wanna come
Run away to a place like that
We might go and never wanna come
We might go and never wanna come back
