

Wonderful World

Ben Rector

I've seen the northern lights
The British countryside
Every single southern college town

Sat with important men
And felt like one of them
Stood at Cypress in between the clouds
Thought I'd seen all there is to see

Spent all this time chasing my dreams
But none of them came true till you were here with me
It's a wonderful world filled with fabulous things
I'd trade it all away to have you here with me
It's a wonderful world
It's a wonderful world

I've taken medicine
I bought an ottoman
I got a bigger house with bigger trees

I'm getting better at
Not blaming mam and dad
I'm trying to figure out what it all means
I thought that I'd done all the right things

I spent all this time building a dream
But none of it came true till you were here with me
It's a wonderful world filled with fabulous things
I'd trade it all away to have you here with me
It's a wonderful world
It's a wonderful world
It's a wonderful world
It's a wonderful world

I spent all this time chasing a dream
But none of it was true until you were here with me
It's a wonderful world filled with fabulous things
I'd trade them all away to have you here with me
I'd trade them all away to have you here with me
