

Brown Bird

Ben Reilly

I need some nasty
Something real real nasty

Brown bird baby
Want you for the long run
Sing for me baby
I can make it worth your while (wow)
Come and Sit down

This a forever thang ain't it? (come back)
Could never ruffle your feathers baby I know your language
I'd be a tenant in your mind
At least I hope so
Just open ya' nest
I see a future witchu I'm not obsessed
You know what it is
A little bit a trust
A lil bit a sex
A little bit to time to unwind while I prepare for the mess
Girl I want you at yo' best don't need influence
Unless it's Cabernet you said you used to it
Spread it for me (wings)
Let it out (sing)
Summertime (fling)
I done seen them dreams
I done woke up five times at the sound of my phone ring
I don't mind a lil compromise when you around I spring
I get real high highs when I'm around you
And super low lows when I'm without you
Benny don't want nothing just console me when I'm manic
And in return, I'll give you passion til you walk like Janet
(Caught in awe)

You inhabit the deepest crevice of my mind
I never thought I'd be someone
Who helped me change and redefine
How I spend time
Or how I want to
I'm doing things that I won't t do
Even if she pass
The memories that passed
Forever hunt you now
All your actions say
You figured me out
Was you feeling me
Back then or just feeling me out
I'll fill you in
On my end
If you hearing me out
But that's neither here nor there
If I was swimming in doubt
Cause now I'm confident
I'll face any consequence
To get to you
You cross my mind
I'm surely crossing continents
I feel no way

Stuck on what you do
And what you say
But that's a day to to
Thoughts of tying the knot
But see why not
Just make that day today
Can't push me in
The wrong direction
Rebirthed my world view
When I could only see
In sections
Spreading knowledge of your aura
Sport and reflection
Spread your wings and fly
I reminiscence on your reflection

Brown bird baby
Want you for the long run
Sing for me baby
I can make it worth your while (wow)

Come and sit down (down)
