

# Drifting

BENEE

I'm on a rollercoaster on a mission to the stars  
An adventure they encounter, on a journey to Mars  
Spacegirl lookin' at me, she has a silver heart  
Robo boy not far from her, body with no bones  
She takes a sip of a magic potion, and her hair starts to explode  
Has he poisoned her, I wonder?  
Will she fall for him, he hopes  
She turns into a flower, robo boy left blind  
He asks her if she feels alright

Space, we're all driftin' through space  
Space, we're all driftin' through space  
And finding our way  
Finding our way

Looks around the corner, but Pluto's where I lie  
Looking out to the skies, hopin' she'll arrive  
My body's made of metal, but my heart's of human kind  
Foolish, I see the light, she won't come down tonight  
She wanna know me, she wanna know me  
But I'm a different type  
She wanna see me, she wanna see me  
But I refuse to fly  
Hope for the best, here I rest, she knows that I'll be fine  
(Hope I've got time)

Space, we're all driftin' through space  
Space, we're all driftin' through space  
Finding my way  
Space, we're all driftin' through space  
Space, we're all driftin' through space  
Finding our way

Finding our way  
Finding our way  
Finding our way  
Finding our way
