

# Dancing All Night

Benjamin Amaru

There is only me and you right now  
There is only me and you in some crowd  
And it looks like we've lost ourselves  
I only see you, I don't see somebody else

So could somebody please tell the lights to fade down  
Speaks my favorite song outloud and  
We start to sing and we start to scream  
Is it you is me or the beat

And when your eyes meet mine I know  
There is no better thing in the world no no  
And for so so long I was caught in the cold  
And now you're bringing back the heat  
You shake the pain from my soul

We will dance like a wave in the sea  
Baby we will dance like a river around free  
Baby we dance like nobody can see  
Baby we will dance like it's just you and me, you and me

And now my legs they start to shape  
I can feel I have hundred percent of  
Quake and no one really gets me except you babe  
You just move a shoulder and you start to fade

I look around but I can't see shit  
And it seems the crowd has disappeared  
But no not you no you're still here  
You shake my heart  
You shake away the fear

And we will dance like a wave in the sea  
Baby we will dance like a river around free  
Baby we dance like nobody can see  
Baby we will dance like it's just you and me, you and me

We will dance like a wave in the sea  
Baby we will dance like a river around free  
Baby we dance like nobody can see  
Baby we will dance like it's just you and me you and me

Like a wave in the sea  
Like a river around free  
Nobody can see  
Like it's just you and me

Like it's just you and me
