

that life

Benjamin Amaru

I never thought that we could rise so high
What if we fall
Will we fly?
They said we're never going to make it out town
But when we left
They came to say goodbye

And we drove so fast
With our heads outside
Our faces in the wind
And we shout it out loud
Nothing will ever slow us down
No

When we'll be chasing that life
Full of love, full of light
When we'll be chasing that life
And this will always feel right
So right, so right, so right

I never thought that we would make it this far
But godspeed
And the sun on our side
They said be careful when you cross those lines
In the end
I think that we'll be fine

And we drove so fast
With our heads outside
Our faces in the wind
And we shout it out loud
Nothing will ever slow us down
No

When we'll be chasing that life
Full of love, full of light
When we'll be chasing that life
And this will always feel right
So right, so right

When we'll be chasing that life
Full of love, full of light
When we'll be chasing that life
And this will always feel right
So right, so right, so right
