

# Difference

Benjamin Clementine

Heard you wanna make a difference, heard you wanna make a difference

No more wanna keep your distance, no more wanna keep your distance

Tired of being hesitant, tired of being hesitant

If you wanna make a difference, if you wanna make a difference

Only love can find the difference, only love can find the difference

Heard you wanna make a difference, heard you wanna make a difference

So you're part of the resistance, so you're part of the resistance

Though we're living through persistence, though we're living through persistence

Putting armour on for instance, putting armour on for instance

Won't really stop their existence, Won't really stop their existence

Glad you wanna make a difference, glad you wanna make a difference

Only love can find the difference, only love can find the difference

On and on

On and on, on and on, on and on

Sing along

Then let love

Let love find, let love find, let love find

The wrong

Glad you wanna make a difference, glad you wanna make a difference

Only love can find the difference, only love can find the difference

Only love can find the difference, only love can find the difference
