

I Got You

Benjamin Francis Leftwich

Baby I got you
And in no time at all
I am gonna be near you
Through the rise and the fall
I don't wanna burden your wings anymore
I just wanna keep you in sight

I been so tired of all this travelling around
A thousand beds later and I look at what I found
But lover when we lay in your car by the road
Finally I see what I've waited to know

You came on in one evening, no warning signs were shown
You burst into my kitchen and you made yourself at home

Baby I trust you
I been waiting for a while
For somebody who could tell me, about living in a lie
Maybe we are one and the same does it show?
Looking for the easiest way to belong

I am so sorry about the height of the walls
That I have been building
While I been blind to it all
I don't wanna promise unattainable things
While I am rearranging

Yeah you came on in one evening, no warning signs were shown
You burst into my kitchen and you made yourself at home
I don't know the reason, why you landed at my door
I don't want us to be fighting anymore

There is nobody that's out there
Who can do it like you do
Who can talk down the thunder
Like there's nothing else to prove

Yeah you came on in one evening, no warning signs were shown
You burst into my kitchen and you made yourself at home
I got you, and in no time at all...
