

Movie Star

Benny Sings

You're like a movie star
Picture perfect like a dream
I don't fit up on that screen
I never did
So many moving parts
Run me down just like a stream
You're a drug and I'm a fiend
I need a fix

Something's out there
Something's out there
Something's out there
Something's out there

Take the best of me
I don't care if you tear down
All we built up in this town
Or what it was
You're the remedy
To the emptiness of days
I don't mind if it's unsafe
I need a cause

'Cause I know something's out there
Something's out there
Something's out there
Something's out there

And maybe if we press on
It won't be so hard anymore
Someone to save me is out there
It's not that far anymore
There must be something out there

Run me down like a stream, so many moving parts
Perfect like a dream, just like a movie star
Run me down like a stream, so many moving parts
Perfect like a dream, just like a movie star
