## **Stay The Same**

## **Bent**

Oh, there's something about you, baby Something that's hard to explain Don't want you to change it, rearrange it I just want you to always stay the same

Though the things in my life keep on changing And the things people say can really hurt Don't you to change it, re, rearrange it I just want you to always stay the same

- I just want you to always stay the same
- I just want you to always stay the same
- I just want you to always stay the same
- I just want you to always stay the same
