

# Feels So Easy

Ber

Sunset, bad beer, and we're in the park  
I know that it's not much, but it feels like a start  
I've been running away lately  
Do you think I'm crazy? I bet you do  
You've been chasing a dream daily  
Anything but safety and I like that about you

It feels good to breathe a little, flirt a little  
So damn good to finally feel a little  
Been a while since someone met me in the middle  
Feels so easy with you, with you  
Feels so easy with you, with you  
Feels so easy with you, with you  
Feels so easy with you, with you

Hilltop, just us, and it's getting dark  
And I don't wanna pack up, but my place isn't far  
I've been letting you in slowly  
Now it's three in the morning, and I don't mind  
You're pulling me in closely  
We're gonna get no sleep and that's perfectly fine  
Cause

It feels good to breathe a little, flirt a little  
So damn good to finally feel a little  
Been a while since someone met me in the middle  
Feels so easy with you, with you  
Feels so easy with you, with you  
Feels so easy with you, with you  
Feels so easy with you, with you
