

Whatever Forever

Ber

I'm in your car again
You roll the windows down and stop lights are the view again
I'm feeling everything
Call it a superbloom the way my heart is racing
I wanna memorize the colors on your face and
I'm on your roof again
And you're putting all sorts of stupid thoughts inside my head
Baby in my defense

We've only got another hour 'til the sun's down
And I could honestly die happy with you right now

Ooh
I can't get you off my mind
Ooh
Every day and all the time

I wanna live in a world where we can hang out forever
On your sofa, watching tv, we could make out forever
You can show me all your favorite songs
We'll listen together
Do whatever forever
Do whatever forever
We'd spend a weekend in the city but make it last forever
You got your hands on my body I wanna feel that forever
Oh baby whatever you want, we can do it together
Do whatever forever
Do whatever forever

Baby it's evident
I see your pupils dilating, it's no accident
We're in our element
You're like the waves in the sea and I'm floating
The way you crash into me, uh
It's like a daydream

Oh I...
I can't get you off my mind
Ooh
Every day and all the time

I wanna live in a world where we can hang out forever
On your sofa, watching tv, we could make out forever
You can show me all your favorite songs
We'll listen together
Do whatever forever
Do whatever forever
We'd spend a weekend in the city but make it last forever
You got your hands on my body I wanna feel that forever
Oh baby whatever you want, we can do it together
Do whatever forever
Do whatever forever

I wanna live in a world where we can hang out forever
On your sofa, watching tv, we could make out forever
You can show me all your favorite songs
We'll listen together

Do whatever forever
Do whatever for-
