I'm resigned beneath the sky To walk on the endless fields Only the night take My only dream away It's my last obsession It's my last obsession to get away And I see illusions I hear whispers all around I tried to hold them back Even if I Circle around and I try to reach the sun It's my last obsession Circle around and I try to reach the sun It's my last obsession to get away My hope has flown away To find a way from here Another day alone Without sharing Circle around and I try to reach the sun It's my last obsession Circle around and I try to reach the sun It's my last obsession to get away
