

## Something Good

Beth Crowley

No makeup in sweatpants  
But you look at me like I'm wearing a ballgown  
When I'm going under  
You grab my hand and hold it so I don't drown  
You know exactly who you are  
It's a beautiful sight  
I made a home inside your heart  
Now you're living in mine

I think we got something good  
I think we got something good  
It feels the way that love should  
Because we got something good

You walk into a room and  
You light it up when you're not even trying  
Sometimes we get angry  
But you never let us go to bed still fighting  
I like when I can make you laugh  
It's never much of a challenge  
We might be really different but  
We keep the other one balanced

I think we got something good  
I think we got something good  
It feels the way that love should  
Because we got something good

They told us that this would feel like work  
But I love what we're doing  
If I could go back and start again  
You're still the one that I'm choosing

I think we got something good  
I think we got something good  
It feels the way that love should  
Because we got something good

I think we got something good  
I think we got something good  
It feels the way that love should, yeah  
Because we got something good

We got something good  
We got something good, oh yeah  
We got something good, good oh  
We got something good
