

Savior Faire

Beth Ditto

I ain't afraid the likes of you
You can't look me in the eye
You don't have an excuse
You took the bait
And I cut your noose
You've had a little too much
Bit off more than you could chew

Don't waste your time on a man who can't commit
Like that, like that
Two-timin', two-faced lover who's over it
Come on, come on

It's alright, I don't care
Call it style, a love affair
Head in the clouds, nose in the air
Good for you and your savior faire

Savoir faire
Who knows if we will ever see the light of day?
Savoir faire
I know that you would never have it any other way

Don't break your back for nothing
Go on, use your head
Some common sense
They say if you don't got the wood
You can't build a fence
After I've come to your defense
Then you got no business over there
Savoir faire
Savoir faire
Like that
Savoir faire
Like that
Come on, come on

It's alright, I don't care
Call it style, a love affair
Head in the clouds, nose in the air
Good for you and your savior faire

Savoir faire
Who knows if we will ever see the light of day?
Savoir faire
I know that you would never have it any other way

Don't break your back for nothing
Come on, like that
Come on, come on, like that
Come on, like that

Just to remember what got you there
You and your, you and your
You and your, you and your
You and your savoir faire
