

# Our Kingdom

## Betraying the Martyrs

Hold my hand !  
We will get through this, you can't do this alone  
This road for us is getting longer and longer  
The stars of which we dreamed burn bright above our heads  
I know you're hurting now, I know you're hurting  
So hold my hand

I will put you back down, where you belong  
We started this together and we'll finish as one

Empty worthless I stood alone

As a family we all stand  
Look into my eyes give me your hand  
I'll pick you up whenever you're down  
When you're down

Watch as I stand proud, because I do this for you

You feel from the skies, washed the alt from my brow  
You nourished the ground now a foundation  
For my home

As a family we all stand  
Look into my eyes give me your hand  
I'll pick you up whenever you're down  
When you're down
