

## Slingshot

Better Off

Can't believe how dark the stark night gets  
I've been getting by by getting down these days  
And even when it's all gone  
You'll never hear the good song  
It must be hard to see news  
I've been there and I can barely get out of my head  
I hope your skin decays  
Forget the past and bombs away  
Hey little angel  
I've got a pebble  
To load in a slingshot and shoot in your eye  
Whose gonna miss you when you die  
So run young messiah  
You're missing pariah

Suck on the weakness  
Keep spinning your lies  
Look in the mirror when you cry  
Why is everything complicated  
I don't have the strength to explain what's going on these days  
And when the world is all wrong  
I'm fading out 'til I'm gone  
I know it's hard to hear truth  
If no one hears  
Let the vultures have their say  
I'll fake a smile so wide  
You'll see the blood inside  
From grinding teeth all night  
My sleepless appetite
