

## Why

Better Off

I like the way it feels to be empty  
Pour out my soul and wait around  
I don't have to feel the pain you feel  
When I act like it's nothing  
So let me see you spill your guts on the floor  
And settle down  
Cause you know I always wonder why  
Why does the rain fall harder every time you try  
I've got the faintest feeling you want to say goodbye  
How did my time go out the window  
Thought someone I knew would wait around  
I don't want to feel the pain I feel  
When I think that I messed up  
Cause everything I feel is a product of how I let you down  
Cause you know I always wonder why  
Why does the rain fall harder every time you try  
I've got the faintest feeling you want to say goodbye

It's so easy losing faith in choosing sides  
If I'm on the brink then give me a break and some peace of mind  
If you feel existential, down and always out  
Can't find your potential  
Lost and never found  
Yeah, we feel existential, down and always out  
I can't find my potential  
Lost and never found  
I like the way it feels to be empty  
Pour out my soul and wait around  
Why does the rain fall harder every time you try  
I've got the faintest feeling you want to say goodbye  
It's so easy losing faith in choosing sides  
If I'm on the brink then give me a break and some peace of mind
