

We watch the city from mine  
And you like it that way  
Romanticize saying bye  
You said the timing was right  
And I want it that way  
I watch you go, it's alright

4 in the morning, pick a fight just for me  
Let's not be lonely, you're on my mind  
4 in the morning, sitting on your floor, we  
Hate being lonely and I can see why

I think I could use some more of you  
I don't know you but I really need to

I think I could use some more of you  
I don't know you but I really need to

Told me I had to come by  
To see you again  
We watch the years take a ride  
Forget another goodbye  
Now you're going again  
You like when I roll my eyes

4 in the morning, pick a fight just for me  
Let's not be lonely, you're on my mind  
4 in the morning, sitting on your floor, we  
Hate being lonely and I can see why

I think I could use some more of you  
I don't know you but I really need to

I think I could use some more of you  
I don't know you but I really need to

My skin on you and it's sweet  
You are the one thing that I need  
I need  
And I can see why

I think I could use some more of you  
I don't know you but I really need to

I think I could use some more of you  
I don't know you but I really need to

I think I could use some more of you  
I don't know you but I really need to

I think I could use some more of you  
I don't know you but I really need to
