

Dope

Beware of Darkness

You are a planet among stars
An ocean among raindrops
Woman I think you're dope

Tell me if you're down to ride
My appetite is running wild
Come on, make it fast
And if I take you home tonight
The only thing that's in my sight
Is, how long will you last
You
You
You
You got me surrounded baby
You
You got me with my hands up
Singing

You are
The goddess in my heart
A queen in the dark
And woman, I think you're dope
Tell me if you're down to ride
My appetite is running wild
Come on, make it fast
And if I take you home tonight
The only thing that's in my sight
Is how long will you last

So you
You
You
You got me surrounded baby
You
You got me with my hands up
Singing

You
You got me surrounded baby
You
You got me with my hands up singing
You
You got me surrounded baby
You
You got me with my hands up singing

Woman I think you're dope
Woman I think you're free
Woman I think you're bad bad bad to me
Woman I think you're dope
Woman I think you're free
Woman I think you're bad bad bad to me
