

## Freak When See

BEXEY

Have I been on your mind every night?  
Cause you constantly been all on mine  
And all I know, blowing smoke to the sky  
In a moment, forget about time  
You know what I need, light switch in the brightness  
The incense burning, my vision blurring  
Do you know what I know? See you floating in the smoke  
Yeah, I know you searching, I feel you lurking  
Something so magical, at your door  
I've got your soul  
Something so magical, at your door  
I've got your soul  
Do you want it back? I know you need it back  
Go on have it back, you don't need to live with that  
Do you want it back? I know you need it back

Go on have it back, you don't need to live with that

Come and get it baby  
Come and get it baby  
Come and get it  
Come and get it baby  
Come and get it baby  
Come and get it  
Come and get it baby  
Come and get it baby

Why don't you admit that you are so lost?  
You don't know where you belong  
And neither do I, but why try deny?  
It is just a part of our course  
Do you feel everything but nothing, clinging onto something?  
To pull you out of that dark  
Do you remember not to trust them, do not ever love them?  
Cause they ain't one of us
