

Heat Of The Moment

BEXEY

I can't apologise for the way that my brain works
But if you keep crying then I guess I'll say sorry
Tryna smile through the pain but this shit hurts
While I'm here for the moment, I'll hold you closely don't worry

We can't keep repeating this all over
Cause we stuck in the heat of the moment
We can't keep repeating this all over
Cause we stuck in the heat of the moment

The revolving door keeps spinning
I'm right, you're wrong, but let's agree to disagree and I
Don't understand the whole sly dropping thintshing...
Tell me how you feeling, and I'll genuinely listen...
I got this unsure gaze like that medusa temptation...
If I turn to stone make sure I'm a fountain they throw their change a
t
They won't ever gimme my flowers while I'm alive
So I thank you for my constant vacation up in your eyes

I can't apologise for the way that my brain works
But if you keep crying then I guess I'll say sorry
Tryna smile through the pain but this shit hurts
While I'm here for the moment, I'll hold you closely don't worry

We can't keep repeating this all over
Cause we stuck in the heat of the moment
We can't keep repeating this all over
Cause we stuck in the heat of the moment

I either think too much or over drink too fast
Under construction had to rebuild from the demolition
I overcompensate greatly for the things that I've done
Seen too much too young, apologise if I'm blunt
Entangled like Will & Jada, but we tied into one
Old flame of mine, yeah, she kept bringing the light to the dark
That old frame of mind I... had to switch it and rise above
I get sick of the repetition that shit feel like it boiling my blood,
uh

I can't apologise for the way that my brain works
But if you keep crying then I guess I'll say sorry
Tryna smile through the pain but this shit hurts
While I'm here for the moment, I'll hold you closely don't worry

We can't keep repeating this all over
Cause we stuck in the heat of the moment
We can't keep repeating this all over
Cause we stuck in the heat of the moment
