

# The Great Revelation

## Beyond Creation

Primitive expansion, lead by repulsion and obsession  
Where the almighty comprehension is hidden by abstraction, secrecy and illusion  
Trading life and existence, we're born and die running through time  
Hypnotized by synthetic realms, desires and addictions  
They told us we are a freedom society, but are we psychologically free?

Taking souls to absolutions and expulsing all judgments from logical solutions  
Human has grown and served, controlled by the heart, directed by brain  
Filling all these years within momentum spheres,  
Perspectives have been floating in  
For which cause we fought, at which price we won?
