

Halo Of The Dark

Beyond The Black

Dreams of eternity used
To fill our endless days
Spent in serenity in a never ending blaze
Strangers in heaven, a glimpse at the stars
Lost in insanity, nothing left but our love

The night falls around us
May your kiss light up my heart
Under the halo, under the halo of the dark
The nightmares, they found us
May your love be our ark
Out of the halo, out of the halo of the dark
May love be our ark
To break out of the dark

Who knows their destiny
We will meet it side by side
Reaching for clarity
Our passion burning bright
Strangers in hell, all is lost, all is gone
Nothing but enemies
You're the spark to keep me strong

The night falls around us
May your kiss light up my heart
Under the halo, under the halo of the dark
The nightmares, they found us
May your love be our ark
Out of the halo, out of the halo of the dark
May love be our ark
To break out of the dark

Dreams of eternity
Used to fill our endless days
We'll meet our destiny
In the angels? golden haze

The night falls around us
May your kiss light up my heart
Under the halo, under the halo of the dark
The nightmares, they found us
May your love be our ark
Out of the halo, out of the halo of the dark
May love be our ark
To break out of the dark
