

Away From Here

Beyond the Void

I can hear you
Even when your tears won't speak
When you fly from day
When you try to hide in sleep

I can read you
Like a crimson trail
To guide me to your hideaway
So come and shed your jail

We're lost in here
Whatever made us stay
I will take you away from here
Can't leave you here
Whatever they might say
Away is the only way

I'm awake now
Can't look away no more
Should have read the signs
Should have done this long before

I will cut you
Out of yesterday
Torn-out pages mark our way
So come and raise your veil

We're lost in here
Whatever made us stay
I will take you away from here
Can't leave you here
Whatever they might say
Away is the only way

Scarlet letters ring inside
Cries of distress red on white
A silent prayer
Away from here

The end still wet in lines of fate
Even if I've come to late
We are safe now
Away from here

We're lost in here
Whatever made us stay
I will take you away from here
Can't leave you here
Whatever they might say
Away is the only way
