

Faminine

Beyond the Void

I fall asunder melting away from me
And every day there's less of me
I cannot save me hollower day by day
I shy away from flesh and bone
I'm caught in her embrace her mirror face
Is burning down my mind
She's what I'll never be
My faminine, where are you taking me
Grain by grain
I follow her lead
And join the sand beneath her feet
She's my hunger, she's my everything
And she will leave no trace of me
The pain gives me feedback something to hold on to
In nights of pondering why I'm here
Lets say I could save me
Who knows if I want me to
Cause after all that's all I am
I'm caught in her embrace her mirror face
Is burning down my mind
Do share my bitter pride the more I fade
The more I am complete
Grain by grain
I follow her lead
And join the sand beneath her feet
She's my hunger, she's my everything
And she will leave no trace of me
Her Love will swallow me whole she will
And spill me into her light she will
Grain by grain
I follow her lead
And join the sand beneath her feet
She's my hunger, she's my everything
And she will leave no trace of me
