Stay out of my reach like the clouds passing over my head  
Don't mind how much I think of you  
I will call all the loneliness and sadness you've given me  
Love so leave me hanging with a bit of tease  
Your smile melts away my anxiety like the May weather  
Your glare freezes my heart like the January cold  
Gladly swimming in the sea of confusion  
I sing a song knowing I miss you in one direction

Please live and breathe in my imagination  
Like the intangible depth of the unknown galaxies  
So I can love you forever

You are my cosmos  
My universe  
Don't lose that shine that makes you hard to stare  
You are my cosmos  
My universe  
Don't fall like the petals on flower

She's got harmonious facial features  
She has a fruity smile  
She has a voice as if she has swallowed a flower  
Even her subtle breathe makes me feel ecstatic  
She can be a painting in a museum  
And still make me feel all of this  
My queen, my only yearning in my empty day  
Give it to me, the new despair that will ruin me  
Your love opens my eyes then makes me blind

Please live and breathe in my imagination  
Like the intangible depth of the unknown galaxies  
So I can love you forever

You are my cosmos  
My universe  
Don't lose that shine that makes you hard to stare  
You are my cosmos  
My universe  
Don't fall like the petals on flower
