

Wedding Song

Bibi Bourelly

Are you gonna pick up the piece of my heart
If it's crumbling down?
Will you remember the reasons that were still
Here in the first place?
If I can't keep up and I'm ten scenes behind
And life slowing me down
Will you be the angel and lift my feet
Right off the ground?

And there's spies at our window
And fire at our door
And life takes us to things that ain't done before
And our feelings are hurt
And our dreams in the dirt
But you're still my world

You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain

But you tell me the hard truth though it's so easy to lie
Will you fight for the smile on my face
When there's tears in my eyes?
Will you break through the walls round my heart
When my hands are tied?
Will you hold up the mirror to show me my face
When I'm tryna hide?

And there's spies at our window
And fire at our door
And life takes us to things that ain't done before
And our feelings are hurt
And our dreams in the dirt
You're still my world

You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain, ooh

Will you show me what love is
Before you let [?] your lips?
When I made my mistakes
Will you still find my innocence?
And when you [?] a memory
And everything beautiful fades
When they talk about us
Will they say that we never changed?

You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me something I can't explain

You give me something I can't explain
You give me something I can't explain
You give me something I can't explain
You give me

You give me everything
You give me everything
You give me everything
You give me everything
You give me everything
You give me everything
You give me everything
You give me everything
