

A heart won't beat by itself
But that's alright
You may shake your head
But that's a fact of life

The mind can take you on a scenic drive
But you may wake to find
That this was in your eyes

So when you wake up
Just come on over here
Dress like a starlet
Dressed how you wanna feel
And when you're made up
Just come on over here
Dressed how you wanna be

We're not too old to believe in it
Come on over
Get on over
I want you more than I'm needing it
So come on over
Just get on over here
We're still too young to be defeated
Come on over
Get on over
You need this more than you're feeling it
So come on over
Just get on over here

Remember when
All we wanted was a place to be together?
Nothing ever dared come between us
It feels so right
When I hold your body
I can survive on light (Oh, oh, oh, yeah)

Come on over
Get on over
Just get on over here
Come on over
Get on over
Just come on over here
