

Fingers and Toes

Biffy Clyro

Ladies ask why I've got no fingers and toes
I don't like holding anything in case I get too close
Slowly start stabbing my heart until it won't ever beat again
Put my body in an open car and display my useless end

The plague will come and cleanse us all
As we know we deserve
Can we take good care o' ourselves and
We'll scorch the earth

Don't stop breaking my heart so I can sing about it
Don't let me push you too far cause I can't live without it
As this tears us apart can we forget about it
Can we forget one more thing?

When the summer ends
You can feel it cause
The walls come closing in
Don't conceal it that
It's good to feel alone sometimes
