

## Be Still

Big Boi

Be still young heart  
Never will you fall apart  
Be still young heart  
Never will you fall apart  
Be wise my dear you must, learn to just be still  
Until you really really know  
Show me you're right, shine your light  
I wonder when will I know

To hell if I don't pray  
Like a mannequin in the window I don't say  
a, word - I like to sit back, observe  
My heart says do not disturb, and yours  
is like a doorknob, everybody get a turn (yeah)  
Now that's a turnoff, girl, I'm not concerned  
More like the early bird tryin to get the worm worm  
But not on those terms, you got on my nerves  
Say I don't deserve you, you're gonna learn  
Treat it like a perm, leave it be or let it burn (burn)  
Eat 'em like an urr-ange, orange  
So when they on the verge of leavin it don't get borin  
Foreign trips are taken  
just to see your smiley faces, time's a-wastin  
And I don't like to waste no time  
You can be down or.. yeah

I love bein in love (bein in love)  
Then you let me down, turned my heart around  
Givin up on love, makes my ocean drown  
You lived in my heart  
Secret melodies haunt me at night  
Maybe lies and lullabies  
This is my last farewell  
You let me down

Yeah... From behind the Cadillac do'...  
Grip this wood, slide around real slow...  
Just thinkin, mind blown  
As I glare through the smoke tinted windows...  
And be still
