

## Different Light

**Big Daddy Weave**

I used to think that everyday before the day I met You had been wasted time

And there are places on that tape that I would so quickly erase if could just rewind

But that's not who I am anymore  
Cause there's no after without before

I see it in a different light  
Now I understand the story of my life  
Why You brought me to right here where I am tonight  
I see it in a different light

I took so many steps that led to nothing but regret and I still wear the scars

But all those pictures in my past now they're reminding me of just how beautiful You are

Oh those old songs have a brand new sound  
And oh my whole life's feeling new somehow

I see it in a different light
