

# Monster

## Big Data

I live in my dreams  
Can't blame me for trying  
Just a simple man  
Swear that I'm not lying  
If you could find a way  
To take away the pain  
Wouldn't you chase it?  
Wouldn't you chase it?

Worked all through the night  
Was filled with good intentions  
To build a better mind  
That was my invention  
Thought I'd found a way  
But now I'm losing faith  
Why did I chase it?  
(Why did I chase it?)

I created a monster  
It's out of control, it's going to take me  
I created a monster  
I didn't know what I was making  
I created a monster, oh-oh (oh)  
I created a monster  
But now it's coming, coming for all of us  
Now it's coming, coming, oh

Thought I was a god  
Obsessed with my creation  
Yeah, I felt the power  
Beyond imagination  
If you could roll the dice  
For a taste of paradise  
Wouldn't you chase it?  
(Wouldn't you chase it?)

I created a monster  
It's out of control, it's going to take me  
I created a monster  
I didn't know what I was making  
I created a monster, oh-oh (oh)  
I created a monster  
But now it's coming, coming for all of us  
It's coming, coming, coming, yeah  
It's coming, coming, coming, for all of us  
It's coming, coming, coming, yeah  
It's coming, coming, coming, for all of us

Where is my conscience?  
Where is my salvation?  
We've become the prey  
And the hunter has no patience  
There's nothing I can say  
To make this go away  
Why did I chase it?  
(Why did I chase it?)

I created a monster  
It's out of control, it's going to take me  
I created a monster  
I didn't know what I was making  
I created a monster, oh-oh (oh)  
I created a monster  
But now it's coming, coming, for all of us  
It's coming, coming, coming  
(To take me away)  
It's coming, coming, coming  
It's coming, coming, coming  
I created a monster  
Now it's coming, coming, for all of us  
  
I created a monster
