

The Glow

Big Data

Dark tiles, hiding in the white lights
Ain't nobody gotta go
White eyes, hiding in the black lights
I don't cancel with the glow

Come and run with the masses
It's a new ride or pass it
You know you a justice, boy
Going on with the masses
But I'm here to question
All for the message, boy
Oh yeah

Thank you lied over
When you waited (the right to get ya)
Don't go cry out for another hand
All in time, let you go
But I won't forget

Dark tiles, skipping to the white lights
Ain't nobody gotta know
Everybody's in the glow
Get ya, I'm gonna get me sad (get me sad)
Ain't body gotta know
Everybody's in the glow

Coming wrong with the masses
You know what your past is
You know what you asking, boy
Going wrong with the masses
But I'm here to question
Down to the ashes, boy

Thank you lied over
When you waited (the right to get ya)
Don't go cry out for another hand
All in time, let you go
But I won't forget
