

## Step Right Up

Big Drill Car

Step right up  
And realize that you're missing  
The one that's nearest to you  
Left blind once  
Now wives are for the listening  
And learn the value of you  
So when we're tired and grown old  
We'll cherish this promise we behold  
Step right up, and educate the listening  
They won't stay that way for long  
Take your stand now  
And take my hand now  
And lead me to your slice of life  
It makes me want to run and hide  
I know sometimes you have no clue  
But I am always here for you  
So when you think of things to come  
It's to your side I know I'll run  
Step right up, and lives are for the listening  
And lead them to your slice of life  
It makes me want to run and hide  
I know sometimes you have no clue  
But I am always here for you  
So when you think of things to come  
It's to your side I know I'll run
