(I wish we could stay to see what happens)
We have to let them find their way, but we will create an end

Came back like the Mack, Caddy cut dime in the back
Eight track slap off the rack, I have to relapse
Po' of the fo' out the tap, break a bro back to the snap
She lives in my lap, eager to give up a snatch
Still on the pry for my match
The milk and the honey
It's all about the love for the money
Space age pimp was adapt, that's after the fact
Land that I may contact, destroy if they give their bomb back
Prepare for combat, peace and love is beyond that
Should've went with my comrades, it's actual fact
Eye what they actually lack at the peek of their deck
Where their soul and mind is attached
Stars fully aligned on the map, my plan of attack
For the lost generation

This ain't meant to be preached on This here meant to be teached on I know that you ain't got much time I promise this rhyme won't take long You need it in your life like you need a better job Like you need another hobby Instead of waiting in the lobby, with the soft and the hard Until the police holla copy, freeze I know how it get when you ain't got shit to flush And them balloons you bought getting bust Cause everybody want mo' than what they really say so You don't know who to trust On the outside looking in of the Beamer, Bentley, Benz Dreaming about the backseat But you don't know what the driver had to do just to pass by you That's if you ask me So, shawty, don't do the dash on 'em I hope you never crash on 'em What good is flashin' or livin' the fastest If you in a casket? I couldn't imagine My mama hanging over me crying Cause my soul is too young to let go of me I'm saying what I gotta Cause the club songs ain't saving my partner
