

Got to have vision

There was a time
When I was young
And the nomad sat me down and talked to me
About a man
Who had a dream
To make us people equal
Some in the world that never seen
Then he said
To the man that is not scared
Can make a difference in this world
But there's one thing
That you need
You can't fight the fight without it
So listen carefully to me

Vision
Got to have vision
To bring change in this world
Vision
Got to have vision
To rise against the darkness in this world

Now I tried to understand
The part where in the words that spoke to me
Over time lost at sea
That the man changed the world
Was just the same as you and me
With a vision
They act upon their feelings
The burn inside lifted cause their alive

Vision
Got to have vision
To bring change in this world
Vision
Got to have vision
To rise against the darkness in this world

Vision
Got to have vision
To bring change in this world
Vision
Got to have vision
To rise against, rise against the darkness in this world
Got to have vision
Who got a vision
Vision
Got to have vision
