

# Digital Devil

Big Smo

You didn't know but it's the game plan  
To make you so afraid you never take a stand  
You caught up in a web of distraction  
Fatal attraction  
You so hooked, so you swipe for the action  
Headlines got you hypnotized  
If you ain't sharing their perspective then you're demonized  
You can sleep like a sheep  
Or you can run with the lions  
Take the backlash, or be compliant  
Try and break from the matrix, can't escape this  
Dystopia, from the right to the left  
They gang-rape America in the same bed  
Watching our Stars and Stripes get painted red  
Dog whistling let 'em condition while  
While you watch your freedom topple down  
Ain't it sickening  
Silicon Valley  
Puppeteering the strings  
The American dream  
Yeah, they wiping it clean

The media's the most powerful tool  
Weaponized and they're aiming at you  
Full clip and they're ready to shoot, hey  
They're coming for your kids too

One nation under control  
Shut up and do what you're told  
I'm never selling my soul  
To the digital devil  
One world that they wanna rule  
Can't let 'em re-write the truth  
Mark of the beast  
It's a battle  
With the digital devil

Digital devil

Tell 'em

Yeah, they got us logged in for life  
And my iPhone cut just like a knife  
Yeah, they programming all of us overnight  
But is the information  
Left over from the right

Shit, I might fuck around and get canceled  
Talk about facts that you can't handle  
The media is one big scandal  
And society is stuck on the same channel, shut it off  
Let's take it to a new height  
You ain't gotta tell me about FaceTime  
I get it in with my kinfolk every night  
We throw down and outcome is just fine  
Let us live in a world less political  
Cause being human has become so typical

How'd we ever get so damn critical  
Energy cynical  
Prison in our minds got us living like a criminal  
Yeah, we might disagree about a lot, yeah a lot  
But not enough for our kids to get shot  
In the same seats where we all taught  
About the birth of this country  
And how it was bought

One nation under control  
(One nation)  
Shut up and do what your told  
(Shut up)  
I'm never selling my soul  
To the digital devil  
One world that they wanna rule  
Can't let 'em re-write the truth  
Mark of the beast  
It's a battle  
With the digital devil

Now this ain't gonna end well  
If we let 'em brainwash our kids  
So they can't tell  
Their own God given rights  
For their so-called safety  
Take the backbone so they crumble like a pastry  
They claim they want to educate  
Only wanna complicate  
Kinda looking like they wanna segregate  
Gotta take the serpent before it's too late  
I know it's heavy but we won't break

One nation under control  
(One nation)  
Shut up and do what you're told  
(Dhut up)  
I'm never selling my soul  
To the digital devil  
One world that they wanna rule  
Can't let 'em re-write the truth  
Mark of the beast  
It's a battle  
With the digital devil
