

Here With Me

Big Tent Revival

Isn't it enough just to have someone who
Loves you
Even though you know that someone's
So far away?
Here I am alone again another season
When I close my eyes I feel you here with me
You said you'd always love me and you
Would never leave
Sure as the sky above me I believe...

Mountains high and valleys low
Desert land and driving snow
Like a river to the sea you are always
Here with me

The world is full of those who verbalize
Endearment
A million times they'll say a million
Times they'll let you down
You are different from the others
Who surrounded
Here with you I have a place to lay my
Burden down

Dark the night and bright the day
Living light shine my way
