

## Feel Good

Big Wild

I think I might feel good  
Get myself together might feel good  
I think I'm going up, think I'm going down  
Think I'm gonna let it all to let it all out  
Yes, I'm gonna feel good  
Get yourself together in all the right ways and just feel good

Strain to open up my eyes, heaviness sinks in  
You're on the other side, I'm lingering  
What if I slip away, go the other direction?  
Fall a little deeper and deeper where time means nothing

Not trying to let you down  
Pursuing what I want  
I'm spending all these days  
So, I can be ready to bloom

I think I might feel good  
Get myself together might feel good  
I think I'm going up, think I'm going down  
Think I'm gonna let it all to let it all out  
Yes, I'm gonna feel good  
Get yourself together in all the right ways and just feel good

Sun gets under my skin  
Under my skin  
Under my skin  
Sweat breaking from within  
Breaking within  
Breaking within  
What if I follow through  
But we lose our connection  
I hear your voice closer and closer, where time means everything

Not trying to let you down  
Pursuing what I want  
I'm spending all these days  
So, I can be ready to bloom

I think I might feel good  
Get myself together might feel good  
I think I'm going up, think I'm going down  
Think I'm gonna let it all to let it all out  
Yes, I'm gonna feel good  
Get yourself together in all the right ways and just feel good

I hope you understand  
Who I am  
Who
