

## We Could Share

Big Wild

Why you gotta be so hard on yourself  
Envy everybody but yourself  
When you've got it all  
Why you gotta say those things to her  
Pushing her away, a casualty  
When we could share

Haven't had fun in so long  
Gave it all we got then so long  
Oh never looking back  
but I ain't going out like that  
Things need to re-arrange  
Something has got to change

Wake up  
Realize  
I've got my love's pulling me both sides

Tightrope  
Wish I could fly  
No escaping, my world's collide

When I think about all these thoughts I've wasted  
They echo out in an empty house  
Oh I wanna be something more  
Oh I wanna be something more  
Oh I wanna be something more  
Oh I wanna be something more  
Oh I wanna be something more  
With you

Number one  
Before the numbers  
Open up, open up your mind

Suffering  
By my side  
Forever there, I was just too blind

When I think about all these thoughts I've wasted  
They echo out in an empty house  
Oh I wanna be something more  
Oh I wanna be something more  
Oh I wanna be something more  
Oh I wanna be something more  
With you  
With you  
With you
