

# Believer

Big Wreck

Oh, by design, the knives come out  
As the company gets ready  
Over water and silicone  
Another ancient headache  
It's a hell of a cost with hell to pay  
How the hell'd it stay so steady?  
Mmh, waterways are clogged and jammed  
They suffocate the jetty

And all the time I wondered  
How to get ahead

We look it in the eye as it goes by  
The experts say the experts lied  
At least we tried, kiss them goodbye  
Believers, oh  
We look it in the eye as it goes by  
We had no time, the time went by  
All this time we just been trying to be heard  
Oh

(One more rule to bend, defy)  
It's the kind of thing we're known for  
(One more fool to win the prize)  
Yours or mine, they find themselves a way  
(Stumble and you're left behind)  
Who do you think they'll save?  
(One less layer to hide behind)  
History repeats yet again

It's a wonder that we still try to survive

We look it in the eye as it goes by  
The experts say the experts lied  
At least we tried, kiss them goodbye  
Believers, oh  
We look it in the eye as it goes by  
We had no time, the time went by  
All this time we just been trying to be heard

We look it in the eye as it goes by  
The experts say the experts lied  
At least we tried, kiss them goodbye  
Believers  
We look it in the eye as it goes by  
We had no time, the time went by  
All this time we just been trying to be heard  
Oh
